KORG USA, INC.

ESX-1 (Electribe SX) Version 1.0.2 Improvement List
Availability - March 2004

The following items describe the functional improvements and bug fixes included in this release

General:
[Bug fix]
When the FX SEND, FX SELECT, or FILTER TYPE keys were pressed (or turned On and Off by a Motion Sequence), sometimes noise was generated. This has been fixed.

[Bug fix]
When using Event Recording in the Song Mode, synthesizer note events and knob tweaks could not be recorded simultaneously. This has been fixed.

[Bug fix]
In a situation where you were Gating the Audio In, the gating produced unwanted noise. This has been fixed.

[Bug fix]
Occasionally, in a situation where SWING was being applied to a Time Sliced part and the sequencer was stopped before the Sliced part had finished playing, the sound got a little wacky. This has been fixed.
